Launch Foxit PhantomPDF Depending on which toolbar mode you're using (Ribbon or Classic), the screen might look a little different. Ribbon mode: Go to File, select Create PDF, then select From Multiple Files. Classic mode: Go to File, select Create PDF, then select From Multiple Files.... A new window opens. At the bottom of the window, select Merge multiple files into a single PDF. To add the files that you want to include in the document, click Add Files... , and then select Add files... Again. You can add files from most Microsoft programs, PDFs, and most image types. Tip! You can also add all the files in one folder by selecting the Add folder... instead of adding the files.... A new window opens that allows you to browse the files. To select a single file, just click on it once and click Open. To select multiple files, hold down Ctrl when you click, and then click Open. When you add files, they'll be listed with file names and other information. You can change the order of these files by selecting a file from the list and clicking Move Up or Move Down. To remove a file from the list, click Delete. When you're ready to create a new PDF, click Convert. A new window opens asking where you want to save the pdf and what you want to name it. After you're selecting where the file is saved and naming it, click Save. A status bar opens to indicate the progress of the PDF. When the pdf is complete, the Convert window remains open. You can still create more PDFs by adding or deleting files, or you can easily close a window to enjoy a new PDF. If you have any questions, please contact Print & Copy Services at copyservices@pugetsound.edu or 253.879.3737. Need to combine several different documents into a single file? Combining PDFs makes it easy to organize and find content within a single document instead of having to access multiple files. To merge PDFs, you'll need PDF software like Foxit PhantomPDF.
